## Assignment 1 - Part PA

PA Part (20 marks) Create a single <u>PDF</u> nt, with the format HCI Analysis.pdf . No other format and name will be ac

- . (2 marks) Which links must be placed in the navigation bar? Justify your answer by providing examples. Be realistic in your answer as you will have to program these features as part of your website creation. Your answer should not exceed 1-2 page(1). The links placed in the navigation bar must include 4 links:

   Home

These can all be formatted in multiple ways, examples including

Each service will have a gradient background with low opacity, or ev an image. By experimenting with this in CS3 i will be able to make a final decision. However both possibilities lead to the same outcome, adding a stylish look to the site promotes user-friendliness as the sit won't look dull and unappealing.

B. (2 marks) What kind of content should be placed in the main content area of the website to facilitate wellness of clients? Austify your anwer by providing examples. Be realistic in your answer as you will have to code these features a part of website creation. Your answers should not sened 2-3 pages. The main content area of the "home" page will include pictures of the main services the website will provide, accompanying a hyperlish that redirects the user to the specified service upon clicing it. This content includes the services provided by the LIFE website, including. Yough, Meditation, Stretching and Healthy Habits. The reason for this being on the home page is beaceuse this is where the users will be upon first Cicking on the his, meaning it promotes awareness and importance by being on the front page, as well as being easily accessible.

example of what I mean is iterated below: HEADER YOGA **MEDITATION STRETCHING HEALTHY HABITS** 

- E. (4 marks) Create the layout suggested by you in task C with HTML5 and CSS. Use of HTML tables and ready online templates is not allowed.

  Done, file is hosted here: https://pupier.csit.rmit.edu.au/~3902169/wp/a1/
- (6 marks) Once the layout is created, you must think of some sensible website content. Use the folloguide:

  Home page DONE

  Services page DONE

FOOTER

Contact page - DONE

G. (2marks) Add the COVID-19 resource(s)and appropriate information in the footer of the website.

DONE

C. (2 marks) Suggest an alternative (to the one shown on page 2) layout for the website. You will need to draw a well-labelled diagram of the new layout. Consider the feature of HTMLS and CSS3 that might help in creation of this layout. Analyse the alyout considering the points so that see seed use of the website, how user-friendly the layout 67 is the layout ensile will be seed to be a seed use of the website, how user-friendly the layout 67 is the layout ensily editable or extended in future (this is important as clients change their needs, requirements and thought process and website layout needs to be altered for future versions)? You answer should not exceed 1-2 page(s).

By having the main content background a different colour, or a low opacity image adds an aesthetic design to the website, appealing to the viewer's attention.

Each service provided by the website will be placed on the main home page, while also having a Service' subheading in the neightion hav on the top. The reason for this is because if you access a Young you will not need to redirect best to the home page to access another service. The services to will also uphold more information than the home menu, as the home page practically accts as a "shortcut" to access the rest of the website. This introduces ease of access, and promotes user-liferably activities for even the most beginner browner user.

- D. (2 marks) Suggest and explain four ways to make LIFE website accessible. Be realistic in your answer as you will have to code these features as a part of website creation. Your answer should not exceed \$2.2 page(s).

  The property of the property of
- Side navigation-bar with burger menu. By making the side-navigation bar in a burger menu, it can promote the main
  page to hold more information that would have been taken by the horizontal navi bar. This also greatly helps mobile
  accessibility, as a top navigation bar will take up alot more space on a mobile aspect ratio as opposed to a desktop
  website.
- A search function. A search function will be helpful in locating links that the user may need in quick succession rather
  than navigating through tabs to find a specific link. This improves user accessibility, and promotes retention.
- Add stylish design and colourful palettes to the website. By adding different colours and similar palettes, while also sticking to a certain colour theme, it can attract viewer attention and promote user-friendly accessibility by having an aesthetic design. This also means it would not overwheim the user's eyes, and keep a nice, coherent visal for viewers to read and access.
